    Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         DB

Sequence 2, Application US/09122126B

Patent No. 6451575

GENERAL INFORMATION:
APPLICANT: Bristol-Myers Squibb Company
TITLE OF INVENTION: AGGRECAN DEGRADING METALLO PROTEASES
FILE REFERENCE: DM6909

CURRENT APPLICATION NUMBER: US/09/122,126B

CURRENT FILING DATE: 1998-07-24

NUMBER OF SEQ ID NOS: 21

SOFTWARE: PatentIn version 3.0

SEQ ID NO 2

LENGTH: 837

   Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Score
